Skills

React, Redux, Ruby on Rails, Javascript, CSS, Git, HTML, jQuery, RSpec, SQL/PostgreSQL, Node.js, Mongoose, MongoDB, Express.js, Webpack, Heroku, AWS

Projects

SomeTrails (React, Redux, HTML, Javascript, Ruby on Rails, PostgreSQL, AWS, Webpack) [live site](#) | [github](#)

Single page clone of AllTrails where users can look up favorite trails for different cities, areas and parks.

- Created custom text input with Redux to act as search bar that when selected, displays dropdown with index of all parks and trails.
- Implemented frontend and backend user authentication with React Router to ensure users cannot access Protected Routes without logging in first.
- Incorporated comments CRUD through custom transactional database operations using Active Record and PostgreSQL.
- Connected Rails backend to AWS S3 to allow users to upload photos to trails to save space on server and keep user experience responsive.

LFG - LookingForGroup (React, Redux, Javascript, MongoDB, Express.js, Node.js)

[live site](#) | [github](#)

Single page application focused on finding and assembling individuals to collaborate and play a variety of physical and virtual games.

- Led team of 3 engineers, utilizing efficient git workflow, minimizing potential merge conflicts.
- Debugged and resolved 90% of issues involving both front and back end.
- Built front-end using React, Redux, Javascript and RESTful APIs for more efficient and friendly UX.
- Wrote code for leave/join event attendance to ensure front-end and back-end are properly in sync.
- Integrated FullCalendar API to dynamically display all events, user events, and friends events depending on the filtration.

what2Eat (Javascript, HTML, CSS)

[live site](#) | [github](#)

Single page app where users can generate recipes based on the ingredients they have on hand.

- Implemented the SpoonfulAPI to make javascript fetch calls to retrieve pertinent data needed to generate recipes: such as recipe title, preparation, ingredients and list of directions.
- Created a custom filter so users can generate recipes based on strict diets for a more inclusive UX.

Experience

Project Manager / VP of Operations | August 2008 - June 2015 / June 2015 - August 2021

Hill Sportswear Inc.

- Promoted to VP of Operations after successful increase in sales and operational efficiencies
- Researched and implemented inventory system to dynamically keep track of stock, increasing daily operations efficiency by 30%.
- Devised and executed initiative to maintain company operations during pandemic shutdowns by pivoting operations to manufacture only face masks, successfully avoiding employee furloughs.
- Increased yearly sales from \$1 million to \$4 million through effective product development and marketing to follow current sales trends.

Education

App Academy | Fall 2021 | San Francisco, CA

Immersive software development course with focus on full stack web development

Cal Poly Pomona | 2014 - 2016 | Pomona, CA

College credits towards BS Business Management Degree
